Learning outcomes:

At the end of this course you will be able to:

- Recognise common wheat diseases
- Identify some of the more unusual wheat diseases
- Distinguish between the symptoms of disease and physiological disorders

Content:

Disease identification is the first step in successful disease control, but there are many pitfalls. Diseases may be confused with disorders and symptoms often vary depending on the prevailing weather. This course provides a platform to fine-tune and further develop your skills in disease identification in wheat. Devised by Bill Clark the course is based on a series of interactive quizzes and focuses on the key identification symptoms for over 20 key diseases of wheat.

Trainer:

Bill Clark, Technical Director, NIAB TAG
