

# Accurate identification of diseases for successful control in oilseed rape

Protect yield and quality • Achieve better disease control  
Save money on products, time and applications

## Designed for:

Individuals who want to fine-tune and further develop their skills in disease identification in oilseed rape

## Entry requirement:

An intermediate course best suited to those who are **able** to demonstrate some practical experience

## Price:

£150 + VAT as part of a subscription to all e-learning courses at [www.artistraining.com](http://www.artistraining.com) or £20 for access to this course only

## Duration:

30 minutes – self paced

## CPD points:

2 BASIS and 1 NRo50 points

## Learning outcomes:

**At the end of this course you will be able to:**

- Recognise common oilseed rape diseases

## Content:

Despite current ex-farm prices, winter oilseed rape remains a valuable break crop in a combinable crop rotation. Careful attention to agronomy, especially disease management, will help to maximise profitability. Oilseed rape suffers from a number of yield-robbing diseases and accurate identification is the first step towards control.

This interactive quiz-based course, based on a series of images, descriptions and diagnostic features, will help you to identify and become more familiar with ten diseases of oilseed rape leading to improved crop management strategies.

## Trainer:

Douglas Hobbs, Technical Writer, NIAB TAG

eCP03
