

Accurate identification of diseases for successful control in oilseed rape

Protect yield and quality • Achieve better disease control
Save money on products, time and applications

Designed for:

Individuals who want to fine-tune and further develop their skills in disease identification in oilseed rape

Entry requirement:

An intermediate course best suited to those who are **able** to demonstrate some practical experience

Price:

£150 + VAT as part of a subscription to all e-learning courses at www.artistraining.com

Duration:

30 minutes – self paced

CPD points:

2 BASIS points

Learning outcomes:

At the end of this course you will be able to:

- Recognise common oilseed rape diseases

Content:

Despite current ex-farm prices, winter oilseed rape remains a valuable break crop in a combinable crop rotation. Careful attention to agronomy, especially disease management, will help to maximise profitability. Oilseed rape suffers from a number of yield-robbing diseases and accurate identification is the first step towards control.

This interactive quiz-based course, based on a series of images, descriptions and diagnostic features, will help you to identify and become more familiar with ten diseases of oilseed rape leading to improved crop management strategies.

Trainer:

Bill Clark, Technical Director, NIAB TAG
