

Better control of disease in wheat

Protect hard earned yield and quality.
Save money on products, time and applications.

Designed for:

Individuals who want to improve the success of wheat production through better disease control

Entry requirement:

An advanced course best suited to **accomplished** practitioners who want to implement the latest agri-tech research and knowledge on farm

Price:

£150 + VAT as part of a subscription to all e-learning courses at www.artistraining.com or £40 for access to this course only

Duration:

1 hour – self paced

CPD points:

4 BASIS points and 2 NRo50 points available

Learning outcomes:

At the end of this course you will be able to:

- Identify diseases of wheat, their biology and how to control them
- Time fungicide use according to growth stage and variety
- Use the *variety/fungicide planning tool* to see how different varieties respond to fungicide inputs, and the economic optimum use of fungicide according to the wheat price

Content:

Learn about fungicide management and gain access to the unique *variety/fungicide planning tool* which allows users to see how individual varieties respond to fungicide inputs.

Also included is a wheat disease database that covers identification, biology and control. This is an ideal follow-up to the principles learnt in our Wheat disease identification e-learning course.

Trainer:

Bill Clark, Technical Director, NIAB TAG
