

Better black-grass control to reduce threat to yield and profit

Reduce the threat to yield and profit • Optimise black-grass control at the lowest cost
Build resilience into your farming system

Designed for:

Individuals who want to make rotational and agronomic changes to combat black-grass, whilst balancing profitability. This course includes access to tools which allow modelling of decisions in the context of your farm

Entry requirement:

An advanced course best suited to **accomplished** practitioners who want to implement the latest agri-tech research and knowledge on farm

Price:

£150 + VAT as part of a subscription to all e-learning courses at www.artistraining.com or £40 for access to this course only

Duration:

1 hour – self paced

CPD points:

Module 1: 2 BASIS and 1 NRo50 point
Module 2: 2 BASIS and 1 NRo50 point

Learning outcomes:

At the end of this course you will be able to:

- Choose between different control options for black-grass
- Combine control strategies to improve overall control
- Make rotational and agronomic changes to improve profitability on farm

Content:

Module 1 – Principles of control

This module examines the research data on black-grass management to help raise awareness of the control options available and their benefits and constraints. At the end of the module is a short test to help consolidate what you have learned

Module 2 – Maintaining profitability

In this module, you will explore the experiences of two growers whose techniques have helped them to achieve high levels of control on their farms, and learn how to use NIAB's innovative, new black-grass management tool

• Black-grass management tool

- On completion of the course you will have access to the tool and be able to model the effects of rotational changes on the seed bank and the impact on the gross margin on your farm

Trainer:

John Cussans, Weed Management Specialist, NIAB TAG
